▫ Audiology Australia National Conference 2016

📅 22 May 2016 – 25 May 2016

📍 Melbourne Convention and Exhibition Centre (MCEC) - 1 Convention Centre Pl, South Wharf VIC 3006

🌐 <http://eventmobi.com/AUDIOLOGY2016>

Round Table 1

DATE

📅 23 May 2016 from 13:30:00 to 14:30:00

DESCRIPTION

Embedding telepractice into audiological models of service delivery: meeting stakeholder needs

Moderator: Colleen Psarros

There is common agreement in the literature that telepractice can be applied to; delivering remote clinical practice, facilitate training and mentoring using best-practice educational models, and enhance inter-professional healthcare and research collaboration (Swanapoel, & Hall, 2012).

Our panel of experts within the Australian Audiological community have pioneered the use of telepractice for clinical practice including diagnostics, device fittings and ongoing evaluation and (re)habilitation.

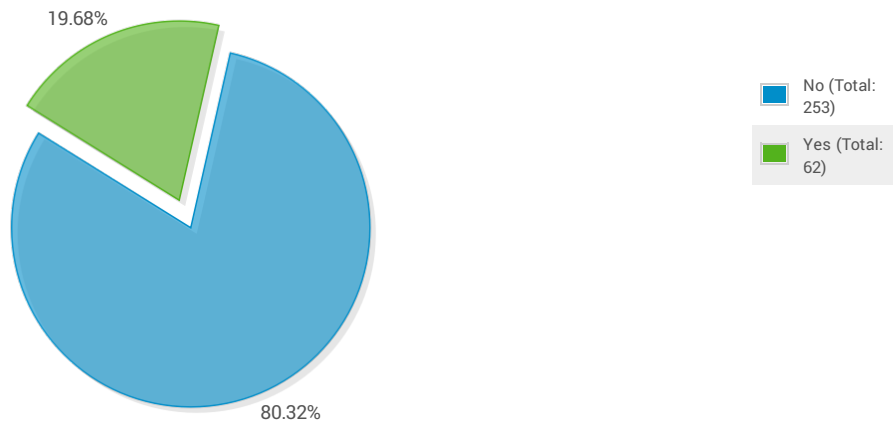

This round table will identify the barriers and facilitators for provision of telepractice and will highlight the evidence base that is used to demonstrate effectiveness and efficiencies of telepractice in audiology.
