

Advanced Bionics

Advanced Bionics Launches HiRes™ Ultra Implant with Mid-Scala Electrode

With guest speaker Michel Neeff, Skull Base Surgeon from New Zealand

Celebrate AB's 25th Anniversary by joining us for an evening of canapés and professional networking. Learn about the new implant from Advanced Bionics as well as the sound processing features designed to help your patients hear their best. Attendees are encouraged to participate in interactive workstations which will focus on; implant surgical techniques, electrode insertion techniques, programming cochlear implant solutions, enhancing the cochlear implant experience through hearing aids and accessories.

This activity has been endorsed by Audiology Australia for 2 CPD points

After completing his training in Otolaryngology and Head and Neck Surgery, Dr Michel Neeff was awarded a fellowship at the Skull Base and Auditory Implant Unit in Manchester, UK where he was involved in skull base procedures including general ENT surgery, acoustic neuroma surgery, and auditory implant surgery including cochlear implants (CI). Since his return to Auckland, NZ in 2007 he has held various positions, currently appointed as Senior Lecturer at the Auckland Medical School, and the current Chairperson and Implant Surgeon for the Northern Cochlear Implant Programme (NCIP). We are honoured to have Mr Michel Neeff join us for our Ultra Launch.
