Explore your diagnostic skills in our virtual clinic

Imagine you want to explore your audiological diagnostic skills in a safe environment, similar to pilots training their skills in a flight simulator. That is exactly what the Interacoustics Academy has created for you.

In the Virtual Clinic you can meet different patients and diagnose their hearing and/or balance problems. Supervisor Karl guides you through the process. After interviewing the patient and testing up to 76 different tests, you can inform Karl about your final diagnostic conclusion. Karl will finish by sharing his interpretation and feedback on every audiological test available.
